MAGNA 100S, THE "SUPER" SCRUBBER-DRYER OF FIMAP FOR POWERFUL AND EFFECTIVE CLEANING OF LARGE INDUSTRIAL SURFACES!

It is available with 100 working width and it is especially suitable for professional cleaning in the industrial sector. Magna 100 S combines power and working autonomy which are its strengths and make it the best tool for accurate, effective, thorough cleaning of large areas such as: heavy industry, fruit and vegetable industry, slaughterhouses, food industry, laboratories and warehouses, logistics and transports, engineering and processing industry. All these places require the effective sweeping-scrubbing action which Magna 100S can guarantee thanks to an excellent mix of really exceptional performance capacity in terms of efficiency and effectiveness. The two powerful suction motors as well as the accurate squeegee adjustment guarantee really clean and perfectly dry floors in a single pass. Let's now consider in detail some of its technical features: the suction filter is completely removable for daily cleaning and it is provided with a protection system which prevents any possible foam infiltration. The fresh water filter is easily accessible for proper cleaning so that a constant water flow can be guaranteed. The control panel is at hand and easy to understand so that the operator can keep conveniently control of each working phase. Speed can be set at three different levels with a simple control. PPL or Tynex brushes can be easily replaced thanks to a comfortable lock coupling. The brush pressure can be adjusted with a lever up to 60 kg. The front motor-wheel - a skid-mark free wheel - allows to work on any floor with the utmost operation safety and without leaving any skid-mark onto the floor after the machine passage. The sweeping-scrubbing unit with contra-rotating cylindrical brushes is completely made of stainless steel to work in the best possible way in any environment, even when using corrosive agents. Also the following parts are made of stainless steel: the large capacity hopper (40 l.), provided with suction system; the squeegee, strong, corrosion-resistant and provided with a quick-release device which protects it from any possible damage due to jamming during operation; the side bars preventing water from leaking out of the working path so that excellent cleaning can be performed on any type of floor. Finally, Buzzer and flasher, i.e. buzzer in both driving directions and intermittent flashing light for safe use also in public and crowded environments. In short, Magna 100 S is the right scrubber-dryer, it is technologically advanced for easy cleaning and it gets rid effectively both of solid residues and of stubborn dirt. A machine which is offered on the market with the best quality-price ratio and the guarantee of the Fimap brand, an added value which is proof of reliability, competence and professionalism. The end user can always count on the most efficient after-sale service because Fimap wants to take care of them in the best possible way.
