15" Grout Scrubber

The Betco 15" Grout Scrubbing Machine is specially designed for the tough task of cleaning grouted and textured floor surfaces. It's cylindrical brush design provides more scrubbing pressure deep down into textured floors than standard disc style floor machines. The cleaning solution is dispensed directly through the brush allowing consistent cleaning performance. A powerful vacuum motor removes soiled solution, drying the floor as it is cleaned. The GS15's dolly style wheels and fold down handle make transport easy. This machine is perfect for cleaning restrooms, showers and smaller areas.

Applications

- Grouted floors
- Textured floors
- Raised rubber floors
- Small areas: restrooms, closets, etc...

Features

- Powerful cylindrical brush system
- Removable tanks for easy clean up
- Scrub and pick up in any direction
- Dolly style wheels for easy transport
- Fold down handle for easy storage

Warranty

3 Year*

*Please refer to Betco Equipment Price/Product Guide for complete equipment warranty information.
