Whirlamatic™ VS20 & 20UHSB

Advance by Nilfisk-Advance

Burnishers

FACT SHEET

Put a hard, high-gloss shine on large-area floors in a hurry with the Whirlamatic™ VS20 or 20UHSB battery-powered burnishers. These high-production models shine a 20 inch (51 cm) path at a rate of 27,000 square feet (2,500 m²) per hour, saving time and money.

Side-by-side comparison tests using a gloss meter on a burnished floor show that the VS20 and 20UHSB produce a brighter shine than competitive battery burnishers.

One reason the VS20 and 20UHSB are so effective is the carefully balanced ratio of weight to pad speed, which produces a spectacular shine on a properly prepared floors. A fully floating pad holder follows uneven floor surfaces, for an even shine. Results are an even, beautiful shine that resists scuffing and wear.

Both models feature a special dust-control system that collects dust in dual collector bags. No need for dust mopping the floor after each burnishing, it's left clean and shinny.

The VS20 model features variable-speed drive to the wheels, for easy transport and working maneuverability. Self-propelling drive on the VS20 glides over the floor with minimal operator effort. Both models have simple controls for easy operation.

Ask for a demonstration to see how these battery burnishers can save you time and money.

TYPICAL APPLICATIONS INCLUDE

- Hospitals/Healthcare Facilities
- Schools and Universities
- Government Buildings and Installations
- Supermarkets
- Shopping Malls
- Large Retail Stores
- Airports

STANDARD FEATURES INCLUDE

• Pad Holder Assembly

Advance Whirlamatic™ VS20 & 20UHSB

Burnishers

Easy-to-use controls at the operator's fingertips. Gauges include battery condition indicator, load indicator and a brush wear indicator light.

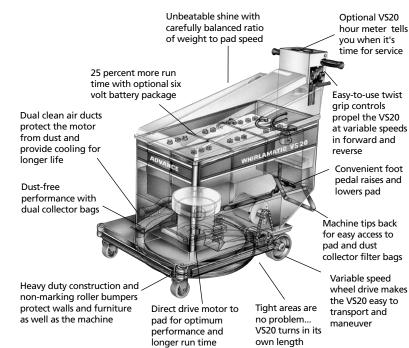

Twist grips start the pad for the V520 and 20UHSB. Twist grips on the V520 control the variable speed in forward and reverse. Variable speed goes from 0 to 270 feet per minute (0-82 meters/min.).

Sturdy battery tray protects components and floor below. It's impervious to battery acid and catches spills that might occur.

Effective dust control system picks up dust with dual collector filter bags while burnishing. Eliminates dust mopping... saves you time and money.

Low Sound Level – only 68 dB A at operator's position

Defining Cleaning Innovation...

- Our products are designed using innovative technology that increases productivity and drives down the cost to clean.
- You can get expert service and maintenance for your Advance machines from factorytrained personnel around the world. Fast parts delivery, too.
- Maintain peak performance with Nilfisk Genuine OEM Parts.

Nilfisk Genuine OEM Parts

Technical Specifications

Motors	2.5 hp, 36 V DC	Length	46 in (117 cm)
Propulsion Means	Permanent magnet drive	Width	25.5 in (65 cm)
	motor - VS20	Height	40 in (102 cm)
	Manual push fully variable	Weight w/o Batteries	
	forward/reverse - 20UHSB		227 lb (103 kg) - VS20
Sound Level	68 dB A at operator position		171 lb (78 kg) - 20UHSB
Pad Holder	Permanently mounted,	Weight w/3 x 185 Ah Batteries	
	flexible, Floats vertically and		612 lb (278 kg) - VS20
	front to rear		556 lb (252 kg) - 20UHSB
Pad Pressure	Fully adjustable	Weight w/6 x 238 Ah Batteries	
Pad Speed (rpm)	Varies with pressure/amp		652 lb (296 kg) - VS20
