Minuteman PowerBoss CP 2832 Complete Package Automatic Scrubber

Versatile Performer

With one chassis and four interchangeable scrub decks to select from, the CP 2832 Complete Package Automatic Scrubber provides four model choices in one machine. Adaptable to meet your cleaning needs, the CP 2832 is available with two sizes of interchangeable scrub decks in 28" or 32" coverage, disc or cylindrical, and optional accessories. Constructed of a steel frame and rotationally-molded polyethylene tanks and bumpers, the CP 2832 is built to last. The CP 2832 is ergonomically designed for operator comfort and ease of use with one button scrub-smart control and an excellent line of sight due to its low profile. With outstanding maneuverability and standard large pneumatic studded tires, the CP 2832 can make an effortless turn on its own axis while recovering all dispensed water.

Maneuverability

The Minuteman PowerBoss CP 2832 Scrubber is designed for operator comfort, safety and efficiency. User-friendly control panels and "comfort zone" hand rails are convenient, easy and safe to use. The hand rails allow the operator to hold the handle at any position, reducing hand fatigue. Due to the low profile design, the operator has an excellent line of sight to the floor in front of the machine. The CP 2832 reduces operator fatigue and provides maximum maneuverability and cleaning efficiency.

Safety and Technology

The CP 2832 is equipped with a "belly bar" that prevents the operator from being pinned behind the machine when in the reverse mode. Also standard is a color coded LED battery gauge that will let the operator know if any error code faults are coming from the on-board computer. This helps pinpoint any problem for easy and quick repair.

Control Panel

The CP 2832's control panel has five easy to understand icons, operated with the turn of a selector switch. A one-touch, directional lever, controls forward and reverse operation. The LED battery gauge lets the operator know when the batteries need to be charged.

| 2. Vacuum Only Mode | 6. Solution Flow Control |
| 3. Scrub Only Mode | 7. LED Battery Gauge/Error Code Display |
| 4. Scrub & Vacuum Regular Pressure | 8. Speed Control |

Rear Squeegee Assembly

The squeegee assembly utilizes a break-away design in case of impact. Removal of the assembly and the blades requires no tools and is quick and simple. The squeegee is self-tracking and picks up all dispensed water on every turn. The squeegee assembly automatically lowers when the machine is moving forward and raises automatically in reverse. Two caster wheels adjust to provide uniform blade deflection. The pitch of the assembly is also easily adjusted with a turnbuckle system. The front squeegee blade features a slotted and non-slotted blade for use on different floor types. The rear squeegee blade is four-sided for maximum extended use.

Durable Construction

The CP 2832 is made with a powder coated, epoxy painted, 11 gauge steel frame to resist corrosion. The tanks and bumper are constructed of a heavy-duty rotationally-molded polyethylene. Rugged construction and reliability, a Minuteman PowerBoss hallmark, means that the CP 2832 Scrubber is built to last.

Optional On Board Off-Aisle Wand and Squeegee Tool

Minuteman PowerBoss' patented off-aisle wand is the key to cleaning hard to reach areas and is offered as an option on the CP 2832. The built in storage space makes the tool on-board, and ready to use. The telescopic wand adjusts for operator comfort. Compact and lightweight, the tool is conveniently attached to the side of the machine and is always available for use.

Interchangeable Decks

All four of the decks and brushes used on the CP 2832 are interchangeable with Minuteman PowerBoss' SCV™ 28/32 rider scrubber.

LED Battery Gauge/Error Code Display

The LED battery gauge also acts as an error code indicator. The error code can help speed up repairs by pinpointing a technical problem and minimizing troubleshooting time.

Choose From 28" or 32" Quick Change Brush Deck Sizes and Two Types of Brush Systems

Disc Brush System

The disc brush system utilizes one 1.5 HP motor with offset right-angle gear boxes to drive the brushes. The brushes are 14" and 16" and counter-rotate at 300 RPM. Cleaning solution is center-fed to the disc brushes.

Cylindrical Brush System

The cylindrical brush system utilizes two 1 HP motors. Two brushes, either 28" or 32", rotate at 900 RPM. Five quick disconnect spray jets uniformly disperse cleaning solution to the brushes. In addition, the cylindrical brush deck has a wet sweeping debris tray.

In both systems, the brushes are computer controlled to follow the contour of the floor. The operator controls the two brush pressure settings from the control panel. Removal of the disc and cylindrical brushes is easy and fast.

Minuteman PowerBoss CP 2832 Complete Package Automatic Scrubber

OUTSTANDING STANDARD FEATURES:

- Interchangeable four scrub decks on one chassis
- Removeable debris box on cylindrical scrub deck
- Fully variable solution flow rate
- Spray jets for cylindrical scrub deck, ensure uniform solution distribution on floor
- Disc brushes are center-fed to keep water & chemical contained with more contact time
- Two caster wheel adjustment insures proper squeegee setting
- One piece, double wall, rotationally molded bumper can be easily removed for brush head access
- Dirty water drain hose extends to five feet, allowing drainage at the side, rear or front of scrubber
- "Belly Bar" to prevent the operator from being pinned against a wall while machine is in reverse
- Large 12" pneumatic tires grip the surface
- Key switch to ensure authorized personnel use only
- Hour meter
- LED battery gauge also acts as an error code warning system
- 900 lb. lifting actuator for raising and lowering the brush head
- Large 31 gallon solution tank and 35 gallon recovery tank, provide for less emptying and refilling
- Squeegee swings from side to side, picking up all water on 180 degree turns
- 4" recovery tank clean out trap

Specifications

	CP 28	CP 32
Scrub Path	28" (71 cm)	32" (81 cm)
Squeegee Width	47" (119 cm)	47" (119 cm)
