

PBU

Propane Burnishers

- Sizes and configurations for any application
- Optional features for complete versatility
- Clean and efficient catalytic converter
- Effective dust and emissions control

Trusted. Reliable. Efficient.

A Nilfisk-Advance Brand

Clarke[®]

Clarke® PBU Burnishers Provide Powerful Results with Superior Dust Control

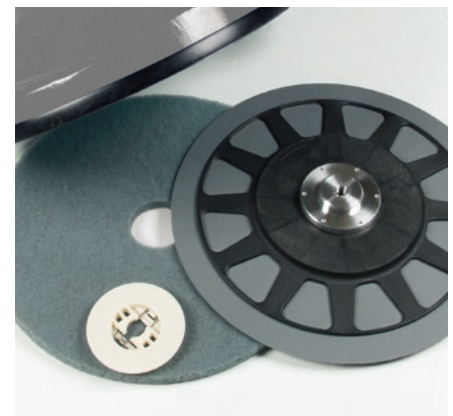

When you need floor equipment to quickly burnish large surface areas to a high gloss, turn to the manufacturer who provides the most power available. Clarke® propane-powered burnishers are available in 21 inch and 27 inch path sizes, so you can choose the best match for your productivity needs. The Dust Control Series also offers superb dust control which is often critical for retail stores, office buildings, educational institutions, supermarkets and sports facilities.

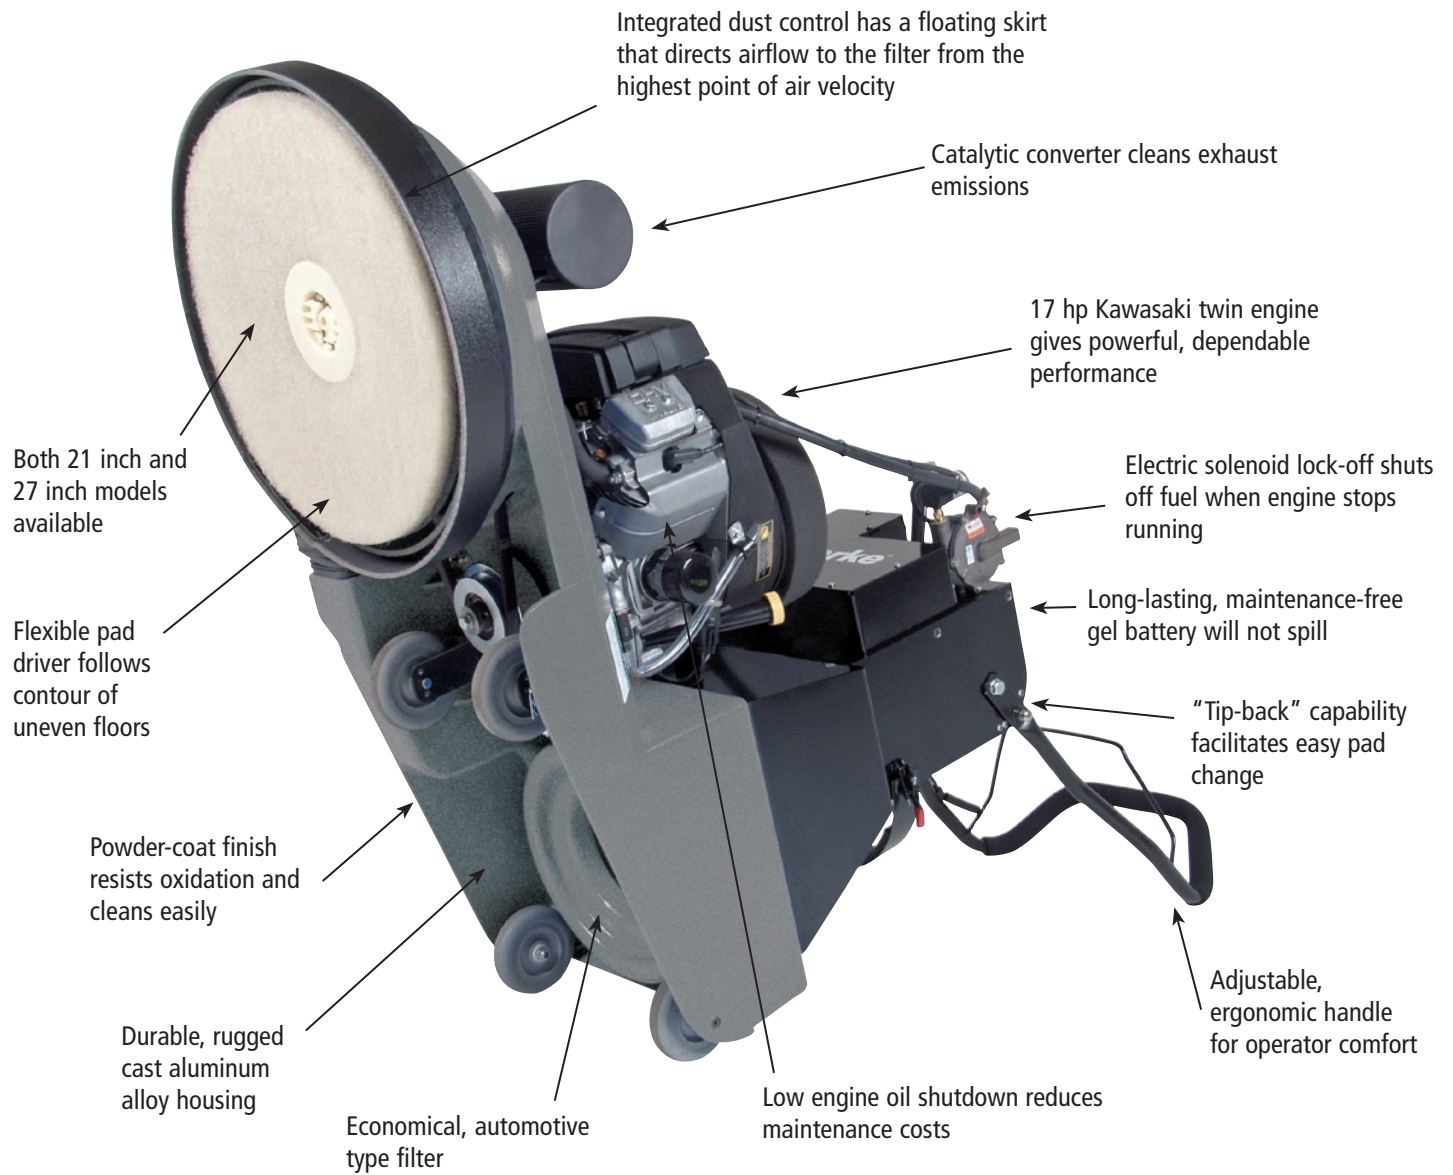

All models have Kawasaki Twin-V engines that provide maximum power.

Large 20 pound 80% safety fill propane tanks offer long working time between refills and also prevents overfilling.

Balanced pad drivers reduce vibration and are flexible to follow the contour of uneven surfaces over floors.

The Dust Control series offers a unique floating shroud that directs the high velocity airflow near the floor to collect six times as much dust as competitive models.

Automotive style air filter for improved indoor air quality. Dust Control system extends pad life by preventing particle build-up in the pad.

Control panel lights inform operator of emissions controls and engine performance. Planned maintenance intervals are easily monitored with the onboard hour meter, and the standard key-ignition switch prevents unauthorized use.

SPECIFICATIONS	Non-Dust Control							Dust Control	
Model	2113E	2113ECL	2113BCAT	2117B	2117BCAT	2717B	2717BCAT	2117BCATCL	2717BCATCL

Height	43 in (109.2 cm)								
Warranty	2 Years Parts & Labor								

Specifications are subject to change without notice.

What enhances its productivity?

- Powerful engine maintains speed under heavy loads
- Flexible pad driver follows contour of uneven floors
- Large 20 pound (9 kg) propane tank offers long working time between refills
- Effective dust control eliminates dust on merchandise, reduces pad build-up

What does it do best?

- Accomplishes high-gloss burnishing with the most power available

- Completes large areas fast for high productivity
- Reduces operator fatigue with ergonomic comfort
- Easy to maintain

What are the optional features?

- 80% safety fill, polished tank
- Carbon monoxide monitor
- Tank storage cages

What are the safety features?

- Catalytic converter for clean air exhaust
- "Carb Gard" emissions monitor
- 80% safety fill tanks prevent overfilling
- Safety certification program
