## Versatile

The NuSource Simpla 20" auto scrubber offers a platform body design with 3 different scrub head options. The 20" disc brush is available with a traction drive system or a manual brush assist model. Grouted tile, uneven floors or other surfaces that have light debris that requires sweeping can be accomplished by the Simpla 20" cylindrical brush with variable speed traction drive. The disc scrubber offers a unique spin on/spin off pad driver that makes installing the pad drive a 'no touch' process. The cylindrical brushes can be removed without tools through the easily opening side panel.

## Operator Features

The recovery tank drain hose is 20" off the ground, facilitating easy draining into buckets or into slop sinks. The control panel is ergonomically designed with large lighted controls, a left or right hand gear shift control and an adjustable height control panel. Solution recovery is second to none with the exclusive squeegee assembly and heavily weighted bracket that works to leave the surface dry and immediately usable. The Simpla series is a great option for all small to medium scrubbing applications.
