

Automatic Scrubbers

CT 70

IPC Eagle

19/20 Gallon, 20, 24, 28" - Brush and Traction Drive

High Productivity

Large solution capacity in a minimum external space

Extensive running time, large battery compartment

Solution Control with automatic stop

Available in brush or traction drive (BT version)

Brush Control with delayed automatic stop

Automatic Scrubbers CT 70

High Performance

CFS (Center Flow System)
Solution distribution from
brush center

CWS (Constant Weight
System) Ensures maximum
scrubbing results

Exclusive squeegee
system assures high
performance at low cost

High quality / high
Performance vacuum
motor

Ergonomics, User Friendly

Great maneuverability
due to optimum weight
distribution

Great working visibility

Designed to assure
Minimum noise levels

Easy to use control
panel

Battery level indicator

Recovery tank
discharge hose at
maximum height

Recovery tank can be
tilted for ease of
cleaning

On board charger can
be easily installed now
or later

External battery
charger plug

Low Maintenance Costs

Inlet and outlet filters for
maximum solution tank
protection

AFS (Anti Foam System)
and shut off sensor
protect vacuum

Spin-on spin-off
brush/pad driver
(single brush only)

Squeegee blade can be
used on 4 sides before
replacement

Squeegee assembly and
blade replacement
without tools

Easy access to internal
compartments

Automatic Scrubbers CT 70

Durability

Tanks and surrounding body in high density polyethylene

Oil bath reduction gear box

Brush head designed to absorb harsh impact

Squeegee system designed to absorb harsh impact

Panel control switches protected against water and humidity

Automatic Scrubbers CT 70

Competitive Advantages

Exclusive squeegee system assures high performance

Incomparable drying results even on the most difficult surfaces due to a very unique design.

Large tank capacity in minimum external space

19/20 gallon (70-75 liter) capacity makes this model very unique in its category.

Solution control with automatic stop

Saves water and chemicals. Solution flow stops and starts upon brush activation.

Maximum protection for the vacuum motor (water level sensor)

1. The vacuum motor is mounted in the highest part of the machine and is protected by a filter and water level sensor.
2. When the dirty water tank is full, the left LED lights up and the vacuum motor shuts down. The right LED indicates when the cleaning solution has reached the reserve and there is enough solution for about two minutes.

Brush control with automatic delayed stop

Saves brush wear and protects the floor surface. Brush rotation stops (3 sec. delay on traction drive) and starts upon brush activation.

Recovery tank can be tilted

Easy to rinse and clean with smooth internal finishes.
