

Advance SR 1005 Rider Sweeper

Optional Accessories Include:

- A variety of brooms for different sweeping needs.
- Left Side Broom Kit
- Polyester Panel Filter
- Back-up Alarm

Some Ideal Applications Include:

- Warehouses
- Manufacturing Facilities
- Government Facilities
- Schools
- Hotels
- Sports Facilities
- Airports

The SR 1005 combines the compact maneuverability of a walk-behind sweeper with the efficiency of a rider. It easily fits through doorways, even onto elevators, and works well indoors or outdoors, on hard floors or carpet.

With dual side brooms, the SR 1005 has a 39 inch (100 cm) sweeping path, and is capable of cleaning up to 53,820 square feet (5000 m²) per hour. A sweeping flap raises to allow the broom to pick up litter, and a highly efficient dust filtration system keeps sweeping dust confined.

The hopper is on wheels and has a

convenient transport handle that allows the entire hopper to be rolled to the dump site.

Visibility is excellent from the operator's position, and all controls are simple and ergonomically located for easy operation. Side and main brooms, as well as the dust filters are easily removed and replaced without tools.

Maintenance access is convenient as well. The top lifts off to expose the battery compartment as well as motors and other service areas.

Advance SR 1005 Rider Sweeper

The cylindrical main broom is easily removed and replaced without tools.

The dust filters are easy to access and replace without tools. Shaker motor clears back filter.

A dust flap lifts to allow large debris to be swept into the hopper, so you don't need to pick it up.

The SR 1005 is incredibly maneuverable, turning around in narrow aisles and getting into tight places.

Top opens completely for easy access to all internal parts.

Hopper detaches and rolls out for easy emptying.

Comes with large, non-marking solid rubber tires.

Main broom pressure is easily adjusted without tools.

Variable forward and reverse controls are ergonomically positioned on the handlebar.

Side brush pressure easily adjusted without tools.

Side broom moves inward against impact.

Compact size with rider efficiency.
