

swingo 150B & E

PREVIEW

swingo 150B & E

The swingo 150 is your first step into mechanised cleaning. An ultra compact upright scrubber drier for spot cleaning and small spaces.

Key Features

- 2.6L tank capacity
- 33cm working width
- Rollerbrush system
- Electric or Li-ion battery option

Key Benefits

- Lightweight, compact design for easy operation
- High mechanical roller scrubbing action
- Cleans and picks up water forwards and backwards
- Small footprint for easy storage
- Electric or cable free Li-Ion battery models

Intelligent Solutions

Operational Efficiency

The swingo 150 scrubber driers **clean and dry in one pass**. Much more effective than a wet mop and no need to wait until the floor is safely dry. By mechanising your cleaning the swingo 150 will give you more time to focus on your core business or use the **time saved for higher risk or more valued cleaning tasks**.

People & Safety

TASKI swingos pick up **double the amount water** of a mop. **Less water = less risk of slips.**

Our micro scrubber driers are quick, lighter and far more ergonomic for operatives than wet mopping.

Brand & Asset Protection

TASKI swingo scrubber driers apply **10 x more cleaning pressure** and remove **5 x more soilage** than a mop for cleaner, drier and safer floors.

Cost control

TASKI Service Options **minimise downtime, fix costs and will extend the life** of your ULTIMAXX or swingo scrubber drier.

With ULTIMAXX choose **IntelliPredict** and get access to state-of-the-art electronic technology, connecting and controlling all electronic parts like motors, pumps and chargers. ULTIMAXX will fundamentally change the landscape to a proactive uptime management model with predictive component management. Take advantage and **save typically 25%** on your repair bills.

Total cost of ownership

TASKI ULTIMAXX and swingo scrubber driers are designed and engineered to **drive out cost** at very stage of ownership. Careful selection means **less unproductive time and less downtime**. Intelligent solutions use **less energy, water and chemical**. Lower maintenance costs are delivered through **less frequent visits and fewer breakdowns**. Machines

engineered to last need to be replaced less frequently. With all new ULTIMAXX the fully connected digital ecosystem and IntelliTouch dashboard along with IntelliTrail 2.0 & IntelliPredict means downtime is a thing of the past. Now your machine should never be out of the game. This all adds up to TASKI's lowest total cost of ownership and your lowest total cost to clean.
