# Advolution™ 20B/20BT/24B/24BT

# Advolution<sup>™</sup> 20B/20BT/24B/24BT

# **Battery Burnishers**

#### Ideal applications include:

- K-12 Schools
- Colleges and Universities
- Hospitals and Healthcare Facilities
- Supermarkets
- Retail Stores and Shopping Centers
- Government Buildings

## Superior Shine in a Sleek, New Design. All at an Affordable Price.

When the job calls for restoring your floor's gloss, the affordable Advance Advolution $^{\text{\tiny M}}$  battery burnisher outshines even its contemporary new look.

The Advolution walk-behind battery burnisher delivers consistent and even polishing with a self-regulating pad pressure and a floating, flexible pad driver. This eliminates the need for operators to make adjustments to the pad pressure. The Advolution is available with a 20 or 24 inch burnishing path with either pad assist or traction drive.

Choose from either wet batteries for dependable long run time, or maintenance-free AGM gel type batteries for even longer run time. The onboard battery charger allows for convenient charging at any 120 volt outlet so that operators don't have to return the machine to a storage area.

Safety isn't sacrificed for price and performance, either. An angleactivated safety switch keeps the machine from starting when tipped back in the pad change position. Superior mobility and line of sight mean the Advolution battery burnisher is just as safe when running.

The Advolution battery burnisher is easier to use than any other burnisher in the market – just turn it on and go. The burnishing deck automatically lowers to the floor when the burnisher motor turns on, and returns to a raised position when the motor is turned off. Simple controls minimize training time and expense.

All models feature the best passive dust control in the market, which helps improve indoor air quality. A felt seal contains all dust within a specially designed shroud, directing it into a dual-port, disposable filter bag. For facilities where indoor air quality is even more critical, optional active dust control is available with the addition of an Adgility™ hip-style vacuum on the front of the machine.

Whichever model you choose, the Advance Advolution battery burnisher gives you high performance, cleaner indoor air quality, and competitively priced equipment demanded in today's market – all in a new, modern design.

Two port dust bag is easy to access for bag changes

Optional vacuum available for active dust control

Easy to operate control panel and palm switches

Pad changes are easier with the tip back design of the Advolution™

**Safety:** An angled safety switch ensures that the machine cannot be activated when it is tipped back to conveniently change the pad.

**Sustainability:** Maintenance-free AGM gel type batteries provide longer run-time and overall useful life (optional).

**Environmental Impact:** Long-lasting AGM gel type batteries eliminate the risk of acid spill and gassing during charging.

**Ergonomics:** Operator handles are designed for maximum comfort and maneuverability.

**Sound Level:** At just 65 or 68 dB A, operators can burnish anytime, day or night.

**Air Quality:** An innovative felt-sealed system captures all dust and provides the best dust collection of any burnisher.
