DISINFECTANT MISTING SYSTEM

Productivity

- Choose from 35, 50 and 100 ft. application hoses, combined with a 20 ft. power cord for the DMS-5 and 50 ft. power cord for the DMS-16 give you flexibility for any application area.
- Ergonomically designed tools and spray extensions.
- Wheels and casters for effortless movement.
- ADI sanitizer concentrate. 1 gallon dilutes to 182 gallons (3.5 ounces per 5 Gal. for hospital grade sanitizer/disinfectant) of ready to use solution.

General Overview

- The DMS-5 or 16 use a Viton seal 220 PSI high performance pump equipped with an accumulator provides a pulse-free uniform spray.
- Used with disinfectants and sanitizers to achieve hospital grade sterilization levels.
- Made in **USA**. Pump, molded body comprising 98% US components.

VIRUCIDE SANITIZER • DISINFECTANT

STAT is a disinfectant, bactericide and virucide that has been approved by The US EPA to disable/kill the Coronavirus COVID-19. This product is a disinfectant for use in a spray, fog, wipe, mop or dip application.

STAT is highly concentrated; one gallon makes 180 gallons of ready-to-use disinfectant. It has a wide range of bactericidal and virucidal claims including MRSA, Canine Parvovirus, HIV-1 (associated with AIDS), Avian Influenza, Human Coronavirus, SARS, and the most recent 2019 novel coronavirus-Wuhan (also 2019-nCoV).

- Cleared under the FDA for use as a sanitizing solution on food contact surfaces, food processing equipment and eating utensils.
- May be used as a fogging agent to disinfect small and large areas.
- Prevents and controls the growth of mold and mildew.
- Hypoallergenic when dry.
- US EPA Approved.
